

Contec[®]DG

Dispersing Granule Technology 18-24-5

FEATURES & USE TIPS:

- Patented dispersing granule formula
- Greatly reduces fertilizer loss due to ball, shoe & mower pickup.
- Provides a high level of phosphate for vigorous seedling growth & root development
- Slow release nitrogen from MUtech[™]

PRODUCT SPECIFICATIONS:

N - (18%):	4.80% Ammoniacal Nitrogen 7.84% Urea Nitrogen 3.15% Other Water Soluble Nitrogen* 2.21% Water Insoluble Nitrogen <small>*3.15% slowly available nitrogen from methylene ureas</small>
P - as P₂O₅ - (24%):	Ammonium Phosphate
K - as K₂O - (5%):	Potassium Sulfate
S - (1.70%):	Combined Sulfur

PRODUCT CODE:

AGC186WDG5

Date: 040208
Supersedes: 000000
Label: C8

PRODUCT CHARACTERISTICS:

Product Type:

Dispersible granular nutrient

Nitrogen Type:

MUtech[™]

Particle Size:

SGN: 150

Net Weight:

50 lbs.

Coverage:

9,500 sq. ft.
@ Medium Rate

DIRECTIONS FOR USE

Apply only as directed during the growing season.

Use Andersons Golf Products ContecDG® Dispersing Granule Technology 18-24-5 for fairways and other turf areas where a high phosphate fertilization is desired.

Warning: In this product will disperse each granule into thousands of particles. This will facilitate the movement of the nutrients into the soil. This particle dispersion will also eliminate ball, shoe and mower pickup - minimizing nutrient loss.

Application Rates:

LIGHT: 3.13 lbs./1,000 sq. ft.
 LOW: 4.20 lbs./1,000 sq. ft.
 MEDIUM: 5.21 lbs./1,000 sq. ft.
 HIGH: 6.25 lbs./1,000 sq. ft.

Spreading with PTO driven spreaders:

Excessive agitation of Contec DG can result in damage to the Contec DG particles. Keep the PTO operating at 540 rpm or less. DO NOT use agitation

bars or stir bars, as this can result in the premature breakdown of Contec DG granules.

Spreader Settings:

Spreader settings are recommendations only and should be considered as a beginning point for use calibration. Results obtained by an applicator in the field may be different due to spreader production variations, spreader calibration differences, operating variables, and environmental factors (temperature, humidity, etc.). It is recommended that applicators check the pattern and delivery rate for their particular spreader periodically under their operating conditions using the actual product to be applied.

For all applications:

Immediately after application, apply a minimum of 0.2 inches of water to disperse the granules.

Recent research has shown that well-maintained turf is an effective environmental buffer that prevents pollutants from entering our natural water bodies. To help protect these natural resources, avoid applying product to sidewalks, driveways, roadways, and other impervious surfaces. Sweep any misplaced granules back onto the area you are treating immediately after application, since storm drains often empty directly to nearby waterways.

Storage and Use:

Store in a clean, dry place.
 Reseal opened bag by folding top down and securing.
 Use only clean, dry spreaders.
 Do not leave unused product in spreaders.
