Specimen Label

LakePak WSP

Biological Lake Clarifier and Deodorizer

Product Information

LakePak WSP is a concentrated microbial product containing billions of CFUs (Colony Forming Units) of a proprietary blend of bacillus bacterial strains, packaged in water soluble packets. Use LakePak WSP to biodegrade nutrients, organic matter and hydrocarbons. Benefits from the use of LakePak include: reduced sludge and organic sediment, improved water clarity and quality, reduced methane and sulfide odors, and reduced ammonia, nitrate and phosphorous levels. LakePak WSP is non-toxic to humans, fish and other animals.

Storage Instructions

Water soluble film may become brittle at colder temperatures. Avoid excessive handling when temperature is below 40F/4C. See Inner Box Label for Application Rates.

Bacterial Content

Total bacterial count.....billions of CFUs per gram

Colony forming units of:

Ammonia (NH₃) Utilizing Bacteria

Nitrate (NO₃) Utilizing Bacteria

Phosphorus Utilizing Bacteria

Hydrocarbon Degrading Bacteria

Lignin/Cellulose Degrading Bacteria

Directions for Use

1 Acre Foot = 325,851 gallons (1234 kiloliters) of water

Initial Application Rate

Apply 3 lbs. per acre foot of water. Toss water soluble packets into the water dispersing as evenly as possible around the area to be treated. If water temperature is below 50F, apply 4-5 lbs. per acre foot.

Maintenance Rate

Apply 1/2 lb. of LakePak WSP per acre foot every two weeks. If water temperature exceeds 50F for a six-month period, apply another 3 lb. per acre foot curative midway through the season. Best results are obtained with adequate surface aeration. If surface aeration is not available, apply a maintenance rate of 1 lb. per acre foot every two weeks.

Compatibility

Aquatic herbicides: Do not tank mix with aquatic herbicides or algicides containing copper or bromides. If these products are used, apply at least one week before

initial LakePak WSP application.

Storage

Keep LakePak water soluble packets tightly sealed in a plastic bag when not being used. Store in cool, dry location and avoid exposure to direct sunlight. Water soluble packets may become brittle in cold storage conditions and should have minimal handling in cold temperatures.

CAUTION

Keep out of reach of children
