

**PREMIUM 60 SEED MIX**  
**SEED TECHNOLOGY SHEET**

**Description**

Reinders Premium 60 Seed Mix is designed especially for the professional turf manager or homeowner who demands a combination of fine turfgrasses that will consistently provide the absolute finest turf quality. Premium 60 combines the top of the line varieties offering a broad range of adaptability to a variety of environmental conditions. Premium 60 consists of improved bluegrasses, like Midnight, which provide a dark green thick turf. Langara offers excellent winter hardiness, early spring green-up, and rapid establishment. Langara, America, and Victory II add shade tolerance. Langara, Sunshine II and Fiesta III team up for excellent traffic resistance. Langara, Fiesta III and Victory II provide rapid establishment rates and very good drought tolerance. All six components of this mixture are extremely winter hardy and disease resistant. They also have a unique ability to tolerate close mowing down to as low as 5/8" height of cut under golf fairway maintenance. Premium 60 is a carefully selected mixture of cultivars, which provide superior quality turf over a wide range of soil types throughout the entire growing season.

**Formula**

- 20% America Kentucky Bluegrass
- 20% Midnight Kentucky Bluegrass
- 20% Langara Kentucky Bluegrass
- 20% Victory II Chewings Fescue
- 10% Fiesta III Perennial Ryegrass
- 10% Sunshine II Perennial Ryegrass

**Recommended Seeding Rate**

- New Seeding: Rotary or Drop Spreader  
150-200 lbs/acre
- Overseeding: Slicer/Seeder
- 20%-50% existing cover 100-125 lbs/acre
- 50%-75% existing cover 75-100 lbs/acre
- Seeding depth: 1/8 – 1/2"

**Recommended Use**

Premium 60 is intended for use in landscaped areas that demand superior quality. It blends well with most commercially raised sod, and is well suited for areas that use a combination of seed and sod to complete a landscape. Prime areas of use include golf course fairways and tees, quality home lawns, townhouses, condominiums, and prime commercial development.

**Recommended Maintenance**

Premium 60 will achieve a desirable level of quality when fertilized a minimum of three times yearly. Optimum quality is realized with 4 to 5 fertilizations per season depending upon soil type and length of growing season. A mowing height of 1 1/2" to 2 1/2" is recommended for most ornamental turfs. Premium 60 will maintain density and aggressiveness when mowed at 3/4" or slightly lower on golf course fairways.
