

**SALT TOLERANT GRASS SEED MIX**

*25% Fults Alkaligrass*  
*20% Sea Link Creeping Red Fescue*  
*20% Kenblue Kentucky Blue Grass*  
*15% Spartan Hard Fescue*  
*20% Fiesta III Perennial Rye Grass*

This mix is designed for areas where ice-melting salt is used such as medians and parking lots. The Fults alkaligrass is a salt tolerant clump grass with a fine leaf that is slow growing. The Fiesta III is a fast germinating rye, which acts as a cover crop for the blue grass, fescues and Fults.

*Seeding rate 3 to 5 lbs. per 1000 sq. ft. (150 to 225 lbs per acre) (#31-1400)*
