

Improve Fertilizer Performance AND Your Bottom Line!

Use fertilizer with NutriSphere-N[®] from The Andersons

“Overall, turf treated with NutriSphere-N[®] exhibited a similar level of turf quality compared to turf treated with UFLEXX[®]”.

Dr. Michael Fidanza, Ph.D.,
Penn State University

NutriSphere-N reduces nitrification of applied N in soil by keeping urea in its ammonium form before conversion - a great benefit since plants can do more with ammonia form of N than nitrate form.
