

Xeri-Bug™ Emitters

Point-source low-flow emitters for watering the root zones of plants, trees, and container plants.

- The only emitters with self-piercing barbs, making them the easiest to install using the Xeriman™ tool.
- Widest selection of pressure-compensating emitters, with 3 flow rates and 3 inlet options.
- Most compact and unobtrusive emitters.

Features

- Flow-rates of 0.5, 1.0 and 2.0 GPH (1,89; 3,79 and 7,57 l/h).
- Pressure-compensating design delivers uniform flow throughout a wide pressure range (15 to 50 psi; 1,0 to 3,5 bars).
- Available with 3 different inlets (1.0 and 2.0 models):
 - Self-piercing barb for quick, one-step insertion into ½" or ¾" drip tubing
 - 10-32 threaded inlet that easily threads into a PolyFlex Riser (see page 207), 1032 Thread adapter (p. 207) or 1800 Xeri-Bubbler Adapter (p. 207).
 - ½" FPT inlet that easily threads onto a ½" PVC riser (1.0 and 2.0 GPH models.)
- Outlet barb securely retains ¼" distribution tubing (DT-025 or PT-025).
- Self-flushing action minimizes clogging.
- Robust design made from highly inert materials that are resistant to chemicals.
- Durable plastic construction is UV-resistant.
- Color-coded to identify flow rate (on XB-xx-PC and XB-xx-PC-1032 models).

Operating Range

- Flow: 0.5 to 2.0 GPH (1,89 to 7,57 l/h)
