

MELTDOWN BENEATH ZERO®

A Prewet Ice Melting Product

General Description

MELTDOWN BENEATH ZERO is a high performance, environmentally friendly, low corrosive, deicing product used to clear snow and ice from roadways, walkways, driveways and parking lots.

MELTS TO -20°F

Applications

Through the prewetting process, this high-performance granular ice melt can be made to melt faster, last longer and perform better. This also allows reduced bounce and scatter, corrosion protection to spreading equipment and minimizes environmental impact.

MELTDOWN BENEATH ZERO's melting capacity rivals that of calcium chloride, and magnesium chloride, but at a much lower cost.

When used properly it should not be harmful to vegetation. It is safe to handle and is not known to stain shoes, carpet, cement, or asphalt.

Physical Properties

Appearance	Purple Crystal Shape
Odor	Slight

Availability

Safety and Handling

For brief contact, no precautions other than clean body-covering clothing should be needed. Selection of specific items such as goggles, gloves, and boots will depend on the operation. Eye/face protection and appropriate ventilation is recommended for dusty operations or when handling a diluted solution.

Prolonged or repeated exposure can cause excessive drying with symptoms including redness, drying and cracking of skin. Rubber boots and gloves are recommended for prolonged exposure. Wash hands immediately after handling the product.

Consult local authorities for proper disposal information.
