

## PWS-1000, PWS-175 PRE-WET SPRAY SYSTEMS

### Applications

Able to cater to multiple deicing and prewetting application demands.

PWS-175, 75-gallon system has dual-rotary, multiposition spray nozzles which provide 3 different application options when deicing: Wide fan spray, low flow streamer or high-flow streamer for snow and ice busting.

Utilizes most liquid de-ice and pre-wet products.

### Features

75 or 35 gallon capacity

PWS-175, 75-gallon system has state-of-the-art in-cab digital control which allows for activation and adjustment without exiting the vehicle.

All spray nozzles are stainless to eliminate corrosion and reduce clogging.

Single wide-fan spray nozzle at discharge chute for direct application to bulk material.

Powered by the host vehicle's 12-volt system, the system incorporates a SHURflo dual-head, high-flow pump combined with a hydrostatic equalizer tube to minimize pump load and maximize output.

### Specifics

PWS-1000  
30-Gallon Utility Spray System  
Has on/off switch.  
Will fit SP-1875  
SP-3000  
SP-6000

PWS-175  
75 Gallon Accu-Spray System  
In-cab Digital Control  
Multiple Spray Nozzle Heads  
Integrated Variable Speed Controller  
compatible with V-Maxx Controllers:  
SP-8500  
SP-9500
