

TRIPLEMELT®

General Description

TRIPLEMELT® is a blend of sodium chloride, calcium chloride and degraded sugar beet extract. Applied prior to a storm, it will prevent snow and ice from bonding to concrete.

TRIPLEMELT® contains a natural agricultural product with enhanced melting values that keeps product on the sidewalk where residual action can take effect days after the intended application.

Applications

Apply TRIPLEMELT® liquid to sidewalks and traffic areas prior to a Winter storm to prevent the bonding of snow and ice. Light snows will melt on contact and heavy snows will be much easier to remove.

Municipalities have reported that every pound of a liquid deicer prior to a storm can save four pounds of product after the storm.

Availability

5 Gallon Dense Pak
250 Gallon Tote

Safety and Handling

Avoid contact with eyes, skin and clothing. Brief contact is essentially nonirritating to the skin, however, prolonged contact may cause skin to burn with symptoms to include pain, redness and swelling. Use protective clothing, boots, apron or gloves as well as a face shield, chemical goggles or safety glasses.

Consult local authorities for proper disposal information.

For full safety and handling information contact Reinders, Inc. for a copy of the Material Safety Data Sheet for this product.
