

PVC Couplings

Compression Couplings

With compression couplings, no threading or solvent cementing is required. The gaskets provide a positive, leakproof compression seal.

Product #	Description
CC-015	1 1/2" Compression Coupling
CC-020	2" Compression Coupling
CC-025	2 1/2" Compression Coupling
CC-030	3" Compression Coupling
CC-040	4" Compression Coupling
CC-060	6" Compression Coupling

Slip Fix Repair Couplings

Quickly repair PVC pipe with a telescoping slip fix repair coupling.

Product #	Description
S118-15	1 1/2" Expansion Coupling
S118-20	2" Expansion Coupling
S118-25	2 1/2" Expansion Coupling
S118-30	3" Expansion Coupling
S118-40	4" Expansion Coupling

Knock on Repair Couplings

Harco

The Harco "Knock-On" repair coupling is the best repair coupling available on the market today. Harco's unique gasket design allows for travel in both directions, making it as easy to slide the coupling back onto the existing pipe as it was to slide it onto the repair section.

Product#	Description
109-015	1-1/2" Knock-On-Repair Coupling
109-020	2" Knock-On-Repair Coupling
109-025	2-1/2" Knock-On-Repair Coupling
109-030	3" Knock-On-Repair Coupling
109-040	4" Knock-On-Repair Coupling
109-060	6" Knock-On-Repair Coupling
109-080	8" Knock-On-Repair Coupling

Joint Restraints

Solid ductile-iron restraints help maintain secure connections between pipes, fittings, and valves. In many installations, these restraints offer enough strength and support to eliminate the need for concrete thrust blocks.

- Knuckle Joint Restraint - Valve to Pipe Restraint System - Valve to Fitting Restraint System
- Fitting to Valve to Pipe Restraint - Pipe to Pipe Restraint - Fitting to Pipe Restraint
- Clam Shell Fitting to Pipe Restraint

Repair Couplings / Clamps

Romac Repair Clamps & Couplings

501
 The Romac 501 is a color-coded ductile iron coupling that flexibly couples pipes with the same or different diameters. The 501 is for use on steel, cast iron, asbestos cement, plastic and other types of pipe.

SS1
 The Romac SS1 is an easy-to-install all stainless steel repair clamp which provides a full circumferential repair for damaged pipelines. The SS1 is for use on steel, cast iron, asbestos cement, plastic and other types of pipe.

101S
 The Romac 101 is a service saddle with a single stainless steel strap, which has outlet sizes ranging from .5" through 2.5". The 101 is for use on steel, cast iron, asbestos cement, plastic and other types of pipe.

202U
 The Romac 202 is a service saddle with two u-bolts which has outlets sizes ranging from .5" through 2.5". The 202 is for use on steel, cast iron, asbestos cement, plastic and other types of pipe.

Other couplings & repair clamps available.

- 4" Submersible
- Jet & Centrifugal
- Sump/Effluent/Sewage
- Pressure Tanks
- Motors & Controls
