Reinders Professional Grass Seed

| SEED NAME / PRODUCT # | GRASS SEED DESCRIPTION |
|--|--|
| PREMIUM 60 (10-1400) | Premium 60 is intended for use in landscaped areas that demand superior quality. It blends well with most commercially raised sod, and is well-suited for areas that use a combination of seed and sod to complete a landscape. |
| SUPREME (18-1400) | Supreme Mixture is well suited to sun or shaded areas. It is ideal for situations requiring rapid establishment and quick ground cover. Supreme Mixture requires low to medium fertility. |
| DELUXE 50 (11-1400) | Deluxe 50 is designed for new seeding of large areas where initial cost must be kept low and where elite bluegrass cultivars are not required. Deluxe 50 is suited for sunny or shady areas and thrives in many different soil types. |
| LANDSCAPE 40 (22-1400) | Landscape 40 creates wide adjustability with built in safeguards by combining several species of turf grasses. It is well suited to sun or shaded areas. It is ideal for situations requiring rapid establishment and quick ground cover. Landscape 40 requires low to medium fertility. |
| GENERAL 30 (12-1400) | General 30 Seed Mix is designed for new seedings of large areas where initial cost must be kept low and where elite turf quality is not required. |
| SHADE (13-1400) DRY SHADE (27-1400) | Shade Mix is designed for new seedings and overseeding in shaded turf areas. If a lawn is subject to shade that ranges from 25% to 75% coverage, these formulas are recommended. Shade Mix will establish best if seeded in fall or early spring when leaves do not block light penetration. |
| LOW MOW 5 ELITE BLUEGRASS BLEND (25-1400) | Low Mow 5 Elite is highly recommended for golf course tees, fairways and aprons where a highly aggressive turf that can be maintained at a cutting height as low as 3/4" is desired. Low Mow 5 Elite Blend is also excellent for sod producers or for premium lawns requiring the uniformity of pure stands of elite bluegrasses. |
| ATHLETIC FIELD 50-50 ELITE SEED BLEND (15-1400) | Athletic Field 50-50 Elite Seed Blend will provide maximum quality and recuperative potential when fertilized a minimum of three times yearly. Optimum quality is realized with 4 to 5 fertilizations per season depending upon length of season and soil type. |
| ATHLETIC FIELD 80-20 ELITE SEED BLEND (23-1400) | Athletic 80-20 Seed Blend is intended for use on athletic fields. It is particularly useful for renovating athletic fields as well as new seeding. It is an effective formula where a traffic tolerant grass is desired. It is excellent for use where a combination of rapid establishment, elite quality, disease resistance and traffic tolerance are primary concerns. |
| FAIRWAY 80/20 ELITE SEED BLEND (24-1400) | Fairway 80-20 Elite Seed Blend is intended for use on golf course fairways or other fine turf areas where the professional manager desires an elite bluegrass turf. It is also particularly useful for renovating fairways, home lawns or other turf areas devastated by disease. |
| LOW GROW / NO MOW SEED (29-1400) | Low Grow / No Mow Seed Mix is ideal for areas that will not be mowed regularly and will not need any special irrigation or fertilizer. |

Grass Seed

Reinders

Scotts Turf Seed Center

ACADEMY MIX *Scotts*

This is a mixture of bluegrass, chewing and creeping red fescue, designed to produce attractive turf that is highly durable and stands up to hard use and partial shady conditions.

101-1401 50 lbs.

THERMAL PRO TURF 80/20 *Scotts*

This is an exclusive Scott's blend that offers the best Kentucky Bluegrasses blended with the new Thermal Bluegrass. The Scott's Thermal Bluegrass is a very heat wear tolerance variety that outperforms most bluegrasses in the summer months. The germination during the heat and stress of the summer time makes this the prime choice for summer seeding into home lawns and Sports fields. The bluegrasses provide excellent wear tolerance and recuperative properties. The Perennial ryegrass in this blend offers quick germination and erosion control. Each component of this blend has been hand selected to offer diversity and performance.

110-1401 50 lbs.

SPECIAL OVERSEED MIXTURE *Scotts*

An economical mix of 85% Elite Kentucky bluegrass and 15% Elite Perennial Rye grass for overseeding sports fields.

112-1401 50 lbs.

HIGHLAND LINKS MIX *Scotts*

This is the perfect blend of the upper Midwest for natural areas. This blend provides a good no mow option. It will grow to 12-14 inches and will blow in the wind for that good Scottish rough look. Once established it has very low fertility requirements.

109-1401 50 lbs.

SCOTT'S LOW MOW BLUEGRASS *Scotts*

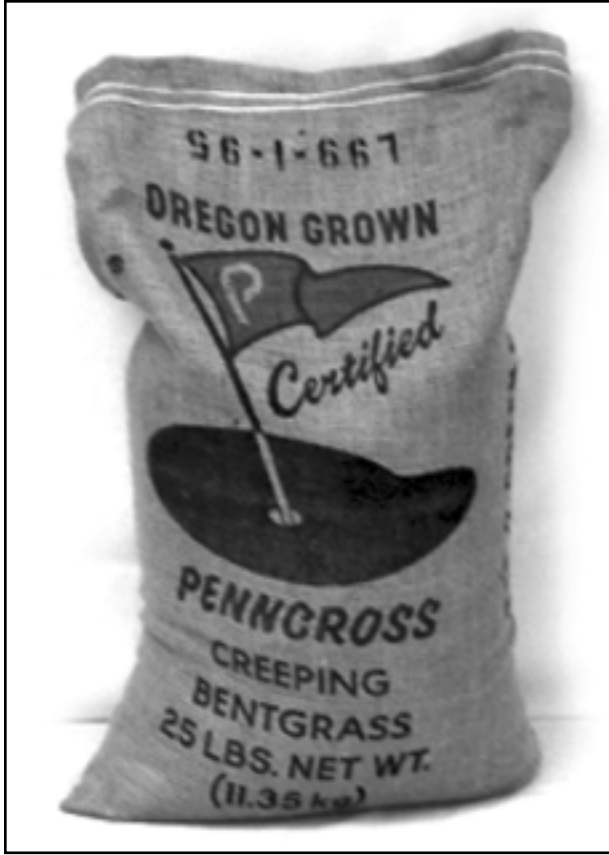

This is a blend of genetically select varieties that are well suited for mowing heights of 0.5 inches and above. Low Mow bluegrass has very good density and color to make it shine in any situation. For use in heavy wear areas due to the extreme wear tolerance of these varieties.

107-1401 50 lbs.

THERMAL SPORTS TURF 50/50 *Scotts*

This is a mixture of exclusive varieties of bluegrass and perennial ryegrass, designed to produce attractive turf that is highly durable and stands up to hard use and heavy traffic.

104-1401 50 lbs.

Bentgrass Seed

Tee-2-Green is the leading supplier of Penn Pals Creeping bentgrass. The Penn Pals have an excellent reputation for improving overall turf performance worldwide. The Penn A's and the Pennlinks II, PennEagle II and Seaside II varieties are custom mix blends to meet any agronomic needs. We also offer Memorial, Declaration and many other bentgrasses to fill any need you may have.
