

Natural Based Fertilizer

Sustane

Sustane fertilizers are biologically active organic products created from a proprietary controlled aerobic process using composted turkey litter. Through this unique process, the turkey litter is concentrated into nutrient dense humus containing beneficial microorganisms with a low burn rate.

Sanctuary

The Sanctuary develops environmentally friendly products from high quality organic ingredients rich in complexed natural plant nutrients. These ingredients offer valuable benefits to soil and plant health by providing an alternative approach to plant management. This natural based approach offers an exciting alternative to traditional methods. Research has shown that traditional methods can deplete the soil of valuable natural immune systems. These systems provide to the plant means of warding off environmental stress, disease and insect problems. The Sanctuary offers products that provide a natural alternative to build and nurture "Nature's Sustainable System."
