

**Plant Marvel**

Plant Marvel products are designed for and used by professionals. Nutriculture® soluble fertilizers dissolve completely in water without any residue and are designed to be used in the finest injectors and spray equipment. There is a wide assortment of stock formulas to choose from, with or without secondary and trace elements and many more special formulations available.

**Milorganite**

Milorganite® is an organic, slow release fertilizer which can be safely applied to plants without the risk of burning, while producing long-lasting results and yielding high-quality turf. Milorganite® is used by golf course superintendents and professional turf managers throughout North America. After all, it's virtually goof-proof and extremely versatile. No unsightly burn marks, and no risk to the environment.
