

Reinders Professional fertilizers for the landscape, golf and lawn care industry cover a wide range of uses and many different applications. Listed are some of the most common blends that we stock. We can also blend any fertilizer to your particular needs, with different nitrogen, phosphorus and potash combinations. We offer combinations products with the best chemistry available – Dimension, Barricade, Merit and Millennium Ultra and more.

There are also different grades of Nutrisphere-N, SCU or Nutralene for your slow release needs. Nutrisphere-N is a polymer that manages and protects granular nitrogen fertilizer by reducing volatilization and nitrification when applied to the soil.

Bulk bags are available upon request with a minimum of 5 ton orders. The Reinders blends will save you money and assure you of quality results.

**Reinders Professional Fertilizer**

Product #	Description	Type	% Slow	SQ. Ft.
