Toro

Small Turf Sprinklers

Toro® sprinklers help you meet every turf requirement with a wide range of models that are as attractive as they are functional. Toro® recognized worldwide for unbeatable versatility and built in dependability to meet your needs. We'll help you grow and maintain a healthy, green environment.

Large Turf Sprinklers

Toro® combines the right services, products and support to tackle the world's premier athletic fields. Toro® products irrigate more golf courses than all other brands combined. From fast retrofit conversion units to hand-held, modular controls, we anticipate your growing needs and deliver flexible systems that feature the latest irrigation technologies.

Valves

Your sprinkler system is only as good as its valves. That's why Toro® valves are designed for rugged reliability even under the most demanding conditions. From light residential use to heavy-duty industrial needs, there is the right valve for every application. Toro® systems are built right from the ground up with products that deliver quality, trouble-free service.

Small Turf Controllers

Flexible, simple to program, operate and maintain. Toro® small turf and landscape water management systems deliver advanced technology that adapts to your changing needs and allows you to manage a wide variety of landscape and small turf applications. Toro® leadership and innovation gives you control and helps you grow.

Large Turf Controllers

Central control systems are very complex electronic components that, when integrated together, provide the brains and the brawn that drive your irrigation system, and Toro® has made it easy. Just decide what you want and Toro® has the control system equipment to meet your needs perfectly every time.

Rain Sensors

For all residential applications, the wireless RainSensor automatically shuts off water when it rains. Coupled with the water saving features offered on Toro controllers, the RainSensor takes total water management a step further.

Central Control

The Toro Sentinel is the product that will watch over your irrigation system and safeguard your landscape against potential problems and unfavorable environmental conditions. Sentinel is the constant guard over your site—the one that takes care of it all, at once.
