Irritrol

2400/2600 Series Valves

Designed primarily for residential use, these durable electric globe and angle valves offer solid construction, reliable performance and convenient operation to accommodate the specific needs of homeowners.

Controllers

Designed for commercial, light commercial and residential use, this innovative hybrid controller offers maximum programming flexibility to handle a wide variety of sophisticated watering requirements in an easy-to-use format. Plus, its modular design ensures convenient remote programming.

Rotors

Distinguished by their durability, reliability and ease of adjustment, Irritrol® Rotors are designed to satisfy the full spectrum of irrigation needs of contractors. Irritrol® Rotors' variable and adjustable coverage capabilities also reduce inventory requirements for the contractor, which in turn benefits the bottom line.

MP ADVANTAGES vs. CONVENTIONAL SPRAYS

- Higher uniformity – even after radius reduction
- Superior wind resistance
- Reduced misting at higher pressure
- Outstanding close-in water
- Lower application rate – less runoff
- Wider operating pressure range
- Lower system cost – ability to put more heads per zone or use smaller pipe sizes

MP Rotator

MP ROTATOR

The MP1000 Rotator is a 8-15' (2.5-4.6 meter) sprinkler (including the 25% radius reduction* capability) that fits any conventional spray head body or shrub adapter.

The MP2000 Rotator is a 13-21' (4-6.4 meter) sprinkler (including the 25% radius reduction* capability) that fits any conventional spray head body or shrub adapter.

Res/Com Irrigation Products

Weathermatic

LX SERIES SPRAYHEADS

Professional sprayhead series featuring T-Plug flush cap and a pressure activated seal providing zero flow-by at low pressure and positive retraction. 3, 4, 6 and 12 inch models. Choice of 3 nozzle series:

brass milled MPR fixed arc, plastic MPR fixed arc and adjustable arc.

SILVER BULLET 12000 SERIES

16 years of proven reliability have established the "Silver Bullet" as the valve of choice. 1" glass filled body and cover with metal-to-metal threading cover bolts for easy maintenance. Option of flow control. Features Weathermatic's "reverse flow" design for extended diaphragm life and internal bleed lever for maximum convenience. M24 solenoid. 150 psi rating.

TURBO T3 ROTOR

Retraction reliability, resistance to contamination and ease of adjustment are the key features of this proven ¾" gear drive rotor. Now available with a selection of 12 field changeable nozzles including 13 degree low angles. Reversible check valve is standard.

SMARTLINE CONTROLLER

SmartLine makes it possible for the fundamentals of water management to work in harmony. Wise stewardship of precious water resources is not only possible but simple, affordable, and truly automated. Now is the time for you to choose SmartLine and start saving money.
