PE-230	Echo Perfect Edger, 22.8cc
PE-265	Echo Perfect Edger, 25.4cc

BROWN

### Trenchmaster Bededger

You've been asking for it and here it is. The Model F-781H BedEdger with the BedMaster rotor is the ultimate tool for defining beds or installing plastic or steel edging. The 8 HP Honda (F-781H) engine provides the power needed to trench in the hardest clays, and the steerable rear wheels make the fancy curves and tree rings easy.

The BedEdger is a lightweight mini-trencher designed for ease of operation and maneuverability. Much more flexible than other mini-trenchers. By removing one nut and changing rotors you may grind small stumps, make standard trenches, prune roots, and much more. Cuts across gravel and asphalt driveways too!

Model #	Description
F781H	8HP OVH Honda Bededger
F991H	9HP OVH Honda Bededger
702-107	6" Bedmaster Rotor
