

DIEHARD

Diehard Flowerbed

DIEHARD™ flower Bed is formulated as a preparation to inoculate the ground with live beneficial mycorrhizal fungi when planting. It contains highly selected species of endomycorrhizal fungi that will quickly colonize the roots of flowering plants to provide the best possible conditions for the roots to grow and extract from the root zone water and nutrients.

Diehard Injectable

DIEHARD™ Injectable is formulated to be used to treat mature and newly planted landscape trees and shrubs with live beneficial mycorrhizal fungi intended for use with root injection equipment.

Diehard Transplant

DIEHARD™ Transplant “naturalizes” the plant and ground with beneficial organisms that all plants have evolved with but generally are void of when produced in a commercial nursery. The product is formulated as a transplant amendment to inoculate landscape trees and shrubs when planted with live beneficial mycorrhizal fungi.

IMPROVES

- Survival
- Rooting
- Flowering
- Water Absorption
- Nutrient Availability
- Yields and Production

REDUCES

- Plant Losses
- Fertilizer Use
- Need Of Pesticides
- Heat Stress Damage
- Irrigation Frequency
- Losses From Drought

Product #	Description
DHFB25	Diehard Flower Bed 25 lb. Bag
DHFB3	Diehard Flower Bed 3 lb. Bag
DHI80Z	Diehard Injectable 8 oz. bag
DHT80Z	Diehard Transplant 8 oz. Bag

MYCORRHIZAL INOCULANTS

BOOST SURVIVAL AND PLANT HEALTH

Transplanting
Flower Beds

Root Injection
Hydromulching

Root Dips

\$TOP \$PENDING MONEY ON RE\$ET CO\$T\$!!

COMPONENTS

Mycorrhizal Fungi
Trichoderma Fungi
Biostimulants
Beneficial Bacteria
Horta-Sorb® Gels

INGREDIENTS

Mycorrhizae (Endo & Ecto)
Trichoderma (6 Species)
Horta-Sorb® Gel
Humic & Folic Acids
Sea Kelp Extract
Yucca Plant Extract

Amino Acids
Vitamins & Enzymes
Bacillus (35 Species)
Pseudomonas (5 Species)
Streptomyces (7 Species)
