Recent research has shown that environmental buffers prevent pollutants from entering our natural water bodies. To help protect these natural resources, avoid applying product to sidewalks, driveways, roadways, and other impervious surfaces. Sweep any misplaced granules back onto the area you are treating immediately after application, since storm drains often empty directly to nearby waterways.

Storage and Use:
Store in a clean, dry place.
Reseal opened bag by folding top down and securing.
Use only clean, dry spreaders.

DIRECTIONS FOR USE
Apply only as directed during the growing season.

For use on greens and tees where a nitrogen and potassium application is desired. Potassium application will help to improve turfgrass resistance to stress. High manganese to correct deficiencies and improve turf color.

Watering in this product will disperse each granule into thousands of particles. This will facilitate the movement of the nutrients into the soil. This particle dispersion will also greatly reduce ball, shoe and mower pickup. Cold weather and/or cold water (lower than 45°F / 7°C) can result in slower particle dispersion.

Application to wet, close-cut golf turf may result in foliar staining, which will discolor the turf to a brown/black appearance. This can occur even if immediate irrigation or rainfall occurs. It is recommended that this product be applied to dry turf only.

Application Rates:
LOW: 1.70 lbs/1,000 sq. ft.
MEDIUM: 3.33 lbs/1,000 sq. ft.
Hi/Gr: 5.00 lbs/1,000 sq. ft.
