DIRECTIONS FOR USE

Apply only as directed during the growing season.

Use Contec DG® Dispersing Granule Technology 22-0-10 on greens and tees where a nitrogen and potassium application is desired.

Watering in this product will disperse each granule into thousands of particles. This will facilitate the movement of the nutrients into the soil. This particle dispersion will greatly reduce ball, shoe and mower pickup. Cold weather and/or cold water (lower than 45°F / 7°C) can result in slower particle dispersion.

Application to wet, close-cut golf turf may result in foliar staining, which will discolor the turf to a brown/black appearance. This can occur even if immediate irrigation or rainfall occurs. It is recommended that this product be applied to dry turf only.

Application Rates:

- LIGHT: 4.16 lbs/1,000 sq. ft.
- LOW: 6.25 lbs/1,000 sq. ft.
- MEDIUM: 7.29 lbs/1,000 sq. ft.
- HIGH: 8.33 lbs/1,000 sq. ft.

FLORIDA APPLICATIONS:

We recommend that you follow the Florida Green Industries BMP's at http://www.flaes.org/pdf/BMP_Book_final.pdf

We recommend that you follow the Florida Golf Course BMP's at http://www.flaes.org/pdf/glfbmp07.pdf

For all applications: Immediately after application, for optimum results, apply a minimum of 0.2 inches of water to disperse the granules.
