

DUMP TRAILERS

1½, TO 8 TON CAPACITIES • WITH REAR & 3-WAY DUMPING SYSTEM

1 ½ Ton Rear Dump

This compact trailer features a hydraulic rear dumping system. The special walking beam suspension with 4 flotation tires allows the trailer to operate in rough terrain without disturbing the load. You can tow this trailer with a compact tractor.

2 ½ Ton Rear Dump

Like its 8 ton big brother, this trailer has a strong tongue and undercarriage assembly that pulls directly to the walking beam axle suspension system. The "haul and dump" versatility and large payload make this trailer a time and money saving winner.

4 & 5 Ton 3-Way Dump

These trailers feature a unique 3-way dumping system, with right, left and rear hinged panels. These dumping options allow for quick, easy trailer spotting for exact location of material drop. Some of the popular uses are golf courses, parks, cemeteries, landscapers, growers and ranchers. Available in 4 ton single axle or 5 ton tandem axle.

8 Ton Rear Dump

This trailer features removable sides and rear dump. Other features include, "over built" frame, tongue and swivel hitch which guarantees many years of trouble free use. Some of the popular uses are golf courses, parks, cemeteries, landscapers, growers and ranches.

Specifications Subject To Change Without Notice

FEATURES:
