

Horsepower®

SELECTIVE HERBICIDE

REIN IN TOUGH WEEDS WITH HORSEPOWER®.

Horsepower® is a three-way, selective post-emergent herbicide that controls dandelions, chickweeds, knotweed, clover, cocklebur, plantains, oxalis, spurge and a wide range of other broadleaf weeds. With its highly concentrated formulation, Horsepower treats up to 4 acres per gallon. And since Horsepower doesn't contain 2,4-D, it's an ideal weed control solution for 2,4-D sensitive areas.

COMPETITIVE ADVANTAGES

POWERFUL CONTROL WITHOUT 2,4-D

- Contains triclopyr for broad-spectrum control of hard-to-kill broadleaf weeds
- Controls more than 150 different weeds
- Ideal for 2,4-D-sensitive areas
- Highly concentrated formulation treats up to 4 acres per gallon
- Can be used for spot treatment
- Helps manage annual use limits of 2,4-D
- Non-restricted use in NY

AT-A-GLANCE INFO

EPA REG. NO. 228-313

ACTIVE INGR. MCPA (48.99%),
triclopyr (5.59%),
dicamba (4.82%)

FORMULATION liquid

CHEM. FAMILY phenoxyaliphatic acid,
pyridine, benzoic acid

HRAC NO. 4

SIGNAL WORD danger

RESTRICTED no

Pigweed
Plantain
Purslane
Ragweed
Red clover
Snakeweed
Sowthistle
Spurge
Tansy ragwort
Thistle
Velvetleaf
Wild violet
Yarrow
Yellow starthistle

USE SUMMARY

RATES

Apply 2 to 3 pts in 20 to 240 gals of water per acre (0.73 to 1.10 fl oz in 0.5 to 5.5 gals of water per 1,000 sq ft) to control weeds growing in turfgrasses planted to bluegrass, fescue, rye, bent (excluding golf course greens and tees), bahia, Bermuda and zoysia.

The maximum application rate is 3.2 pts (1.5 lb ae) per acre per year.

Make up to two applications per year with a minimum retreatment interval of 21 days.

FOR OPTIMUM RESULTS

Do not apply during excessively hot or dry periods unless irrigation is used to keep turf and weeds actively growing.

Do not apply Horsepower® if rain is expected, and do not irrigate, within 4 hours.

Do not mow turf for 1 to 2 days before or after application.

See product label for complete directions for use.
