

SEED TECHNOLOGY

DESCRIPTION

This mixture was developed for high traffic Sports Fields in mind. The mix contains very aggressive varieties of Kentucky Bluegrass, as well as including the quick establishing variety, Shannon. Shannon germinates much faster than most Bluegrasses, germinating in 7-10 days in warm soils. The combination of quick establishment, outstanding seedling strength, and utilizing varieties that have aggressiveness to withstand and excel in high traffic events. This mix utilizes outstanding Perennial Ryegrasses that are rated very high for disease resistance (Grey Leaf Spot and Rust), and overall top performance.

FORMULA

10% SPF 30 Hybrid KBG
20% Shannon KBG
20% Gaelic KBG
25% Elite Variety Perennial Ryegrass
25% Elite Variety Perennial Ryegrass

SEEDING RATE

4 - 5 lbs. per 1,000 sq. ft.
175 - 250 lbs. per acre
