

Aloft®

TWO BETTER.

Two Modes of Action. One Powerful Weapon.

With preventive and curative control, one application of Aloft® Insecticide effectively combats turf pests.

Prevent troublesome surface- and soil-feeding turf pests – including black turfgrass aeteniuss and cutworms – with a single early treatment or knock down existing adult and surface feeding pests.

Plus, Aloft GC SC attacks Red Imported Fire Ants. EPA approved for fire ant control, Aloft GC SC takes them down within seven days and lasting residual control keeps them down season long.

EPA REG. NO. **GC G** 59639-214
GC SC 59639-212

ACTIVE INGR. clothianidin, bifenthrin

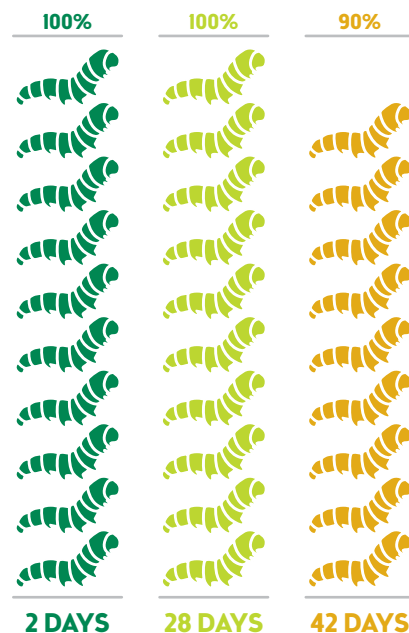

FORMULATION **GC G** granular
GC SC suspension concentrate

Aloft® GC G and GC SC Insecticide are EPA Restricted-Use Pesticides. Always read and follow label directions.

CUTWORMS: CUT 'EM OUT
