

SEED TECHNOLOGY

DESCRIPTION

70/30 Special Overseeder Mix... Combines our high quality Kentucky Bluegrass with Perennial Ryegrass. This mix is developed to quickly repair the damage from summer drought, heat stress, summer patch disease and billbug damage. The Kentucky Bluegrasses varieties were selected for improved long term performance, providing better tolerance to the stresses of summer. 70/30 Special Overseeder Mix is an excellent selection for golf course roughs, higher cut fairways, lawns, parks, and sports turf. By combining the two species, genetic diversity is increased, traits are complimentary, and added protection against disease is provided. In addition, the varieties combined medium-dark green color matches well to most existing stands for turf.

FORMULA

70% Kentucky Bluegrass (Elite Varieties)
30% Perennial Ryegrass (Elite Varieties)

SEEDING RATE

4 - 5 lbs. per 1,000 sq. ft.
175 - 250 lbs. per acre
