

## SEED TECHNOLOGY

### DESCRIPTION

Reinders Shade Lawn Seed Mix is, without a doubt, the finest blend of turfgrasses that are known to be shade tolerant. It is formulated to provide a high level of shade tolerance, while providing vastly better quality than is possible from the traditional combinations of common varieties of Red Fescue, Hard Fescue and Chewings Fescue. Armada Kentucky Bluegrass has excellent shade tolerance is very dense with a dark green color. Winward Chewings Fescue is a cultivar that establishes quickly and has excellent shade tolerance in drier situations. It performs particularly well in situations where tree root competition is a problem. Even though it does well in the shade it will also excel in the sun. It was rated as the top fine leaf fescue in trials at the University of Wisconsin. Jasper II Creeping Red Fescue is a very shade tolerant grass that spreads by rhizomes to form a thick turf and is tolerant of the low fertility and acid soil conditions frequently found under trees. Spartan II Hard Fescue is endophyte enhanced and has improved heat tolerance to go along with its excellent shade tolerance. Replicator Perennial Ryegrass offers fast establishment, excellent adaptability to soil conditions, disease resistance and good shade tolerance for a ryegrass. The shade to full sun transition quality of this mixture is outstanding.

### RECOMMENDED USE

Shade Mix is designed for new seedings and overseeding in shaded turf areas. If a lawn is subject to shade that ranges from 25% to 75% coverage, this formula is recommended. Shade Mix will establish best if seeded in fall or early spring when leaves do not block light penetration.

### RECOMMENDED MAINTENANCE

Shade Mix should be fertilized 2-3 times per season for maximum results. A soil test is recommended for full benefit. A mowing height of 2-3 inches is recommended for maximum drought tolerance and weed resistance.

### FORMULA

20% Armada Kentucky BG  
10% Spartan II Hard Fescue  
30% Winward Chewings Fescue  
30% Jasper II Creeping Red Fescue  
10% Replicator Perennial Ryegrass

### SEEDING RATE

4.4 - 6 lbs. per 1,000 sq. ft.  
200 - 275 lbs. per acre
