## TALL FESCUE

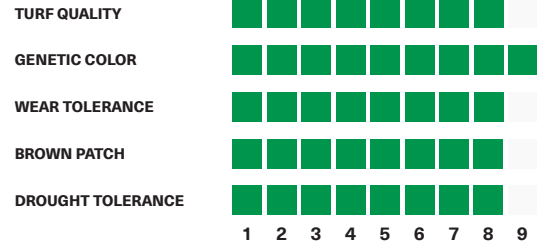

**Team - Tall Fescue Blend** is a turf-type tall fescue blend that contains some of the most widely tested and nationally recognized varieties available. For maximum genetic diversity and adaptation, each of Teams' components are carefully screened and selected for their unique strengths that they bring to the blend.

Team Tall Fescue Blend cultivars are chosen for their abilities such as turf density, dark green color, disease resistance and great persistence that bring overall turf quality to the blend. With superior NTEP tested varieties. You can expect a richer, darker green color, fine leaf texture and excellent environmental tolerance in this blend. All the varieties also have a high endophyte level, for great resistance to leaf and crown feeding insects.

With Team, it's the combination that counts.

For starters, Team requires only 1-4 lbs. actual N per year per 1000 sq. ft. to stay looking green and healthy. The irrigation requirements for Team are reduced too because of Teams' excellent drought tolerance, enhanced by a deep root system.

( Rating: 1- 9, 1: Poor; 9: Excellent )
