

Terra-Mulch® Cellulose Cellulose Fiber

Ideal choice for general seeding!

- Terra-Mulch® Cellulose is less expensive than wood or blend fiber
- An exclusive defibration process and new manufacturing improves water-holding capacity by 22%
- Can be applied at a lower cost than straw and is easier to transport and install
- Terra-Mulch is easy to use and load in equipment—goes into suspension at an accelerated rate, allowing for uniform ground coverage
- Lower percentage of fines greatly reduces maché effect
- Meets or exceeds all requirements for cellulose fiber mulch products
- Non-toxic and environmentally safe
- Maximum slope length of 20 feet
- Use approved hydroseeding equipment for optimum pumping and application performance
- Terra-Mulch Cellulose functional longevity is \leq 3 months

Product Composition:

Cellulose Fiber – 88% \pm 3%
Moisture Content – 12% \pm 3%
(40) 50-lb bales per pallet

Slope Gradient/Condition
 \leq 4H:1V

Rate
1500 – 2000 lb/acre*

*For maximum performance, 2000 lb/acre is recommended.
