

## Dual Union Check Valve 2.0

#48026 MSRP \$59.99

The AquascapePRO Dual Union Check Valve 2.0 provides a professional pump and plumbing connection inside skimmer filter systems, as well as Pondless® Water Vaults. The heavy-duty, swing-style check valve flapper maximizes water flow through the valve when open, while preventing the backflow of water when the pump is shut off or during a power outage. Union connections on both sides of the valve make pump and filter maintenance quick and easy without the use of tools. A set of innovative reversible fittings take the guesswork out of finding the right pump or filter fitting and allows the extension of valve height for taller filter applications, making this a truly universal check valve designed for water features.

- Connects the pump to water feature plumbing
- Innovative reversible fittings allow for universal application
- Prevents water backflow when the pump is not operating
- Dual-union, tool-free design makes maintenance quick and easy
- Heavy-duty swing-style check valve flapper
- Height extendable for larger filters and pumps

**Reversible Fittings Eliminate Guesswork**

- Included fittings make installation a 'snap'
- Simple and easy pump connection

When winterizing your pump, we recommend removing the check valve with the pump and storing both in a frost-free location to maximize longevity.

- ① Angled, swing-style valve effectively prevents back flow
- ② Heavy-duty flapper ensures longevity
- ③ Dual-union connections simplify pump and filter maintenance

### Fittings Included

2x Reversible 2" MPT x 2" Slip, 1x Reversible 1.5" FPT x 2" Slip

## Dual Union 3" CVA Check Valve

#29098 MSRP \$109.99

The Dual Union 3" CVA Check Valve is ideal for larger installations that use large pumps and filters. Heavy-duty, dual-union design ensures years of trouble-free use.
