

For use on all types of turfgrasses, annuals and perennials, SeaXtra Water Penetrating Pellets combat persistent hydrophobic soil conditions and localized dry spots.

Directions for use:

Turf: Remove pellet from container. Place in hose-end applicator and apply to 12,000 square feet during hand watering and/or syringing one to two times a month.

Sod: Apply one pellet to 8,000 square feet at installation and then follow-up with the normal turf application rate.

Annuals, Perennials, Vegetables and Bulbs:

Apply to 8,000 square feet at transplant and at bud set for best results.

NET CONTENTS - 8 oz (226.8 g) Pellet

Water Penetrating Pellet

CONTAINS NON PLANT FOOD INGREDIENTS

Active Ingredients:

50% Propoxylated Polyethylene Glycol

30.0% Polyoxyalkylenes
