

Pre-San® Granular 12.5G

Economical pre-emergent control in a granular formulation

WHAT IT IS

Pre-San® Granular 12.5G Herbicide offers dependable pre-emergent control of *Poa annua*, crabgrass, goosegrass, and other listed annual weeds in turfgrass. With excellent turfgrass tolerance, including tolerance of established greens, tees, and bentgrass fairways, Pre-San is ideal for pre-emergent control on golf courses.

Featuring residual control that lasts up to four months, Pre-San helps reduce breakthroughs and retreatments while helping maintain the uniformity, density, and color of bentgrass. And the convenient granular formulation of Pre-San means it can be applied with a hand spreader or a tractor- or ATV-pulled spreader.

WHAT IT DOES

Pre-San controls:

- *Poa Annua*
- Crabgrass
- Goosegrass
- Barnyardgrass
- Lambsquarters
- Other weeds as listed

Labeled for use on:
