

FLOATING SWAN DECOY

Keep geese and heron away from your pond with the Aquascape Floating Swan Decoy. This realistic swan decoy features a lifelike appearance designed to protect your pond from pests like the Canada goose. Geese cause several issues for ponds and water features, primarily by grazing and creating excess waste, leading to poor water conditions for your pond fish. Other pests and predators, like the blue heron, will prey on pond fish, leading to fish loss. Due to the territorial nature of the swan, geese and herons will often avoid locations where they find a swan is present, helping to keep your pond clean, safe, and healthy.

- Constructed of durable polyresin
- All-weather finish for years of trouble-free use
- Can be used floating on the water or on dry land
- Includes an anchor tab which makes it easy to secure the swan in place
