

AQUATIC PATIO POND KIT

Aquatic Patio Pond Kit
Item #78197

Instructions

STEP 1

- Thoroughly rinse the Aquatic Patio Pond (Ex. 1).

STEP 2

- Place the patio pond in your desired location (Ex. 2).

STEP 3

- Set the pump in the patio pond and feed the electrical cord through the cord relief in the corner (Ex. 3).

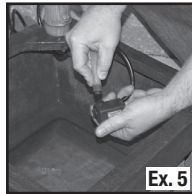

STEP 4

- Feed the fountain tubing through the fountain hole in the corner and secure the bamboo fountain in position (Ex. 4).

STEP 5

- Attach the hose to the outlet on the water pump (Ex. 5).

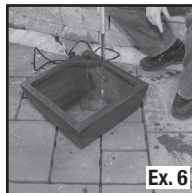

STEP 6

- Fill the Aquatic Patio Pond with water (Ex. 6).

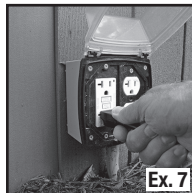

TIP: If you are using a garden hose to fill your Aquatic Patio Pond, we recommend running the hose for a few minutes to flush the hose of any stagnant water.

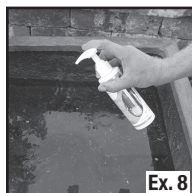

STEP 7

- Plug the pump into a ground fault circuit interrupter (GFCI) rated receptacle (Ex. 7).

STEP 8

- Use Pond Detoxifier (sold separately) or allow the water to sit for 24 hours before adding fish or plants (Ex. 8).

STEP 9

- Add plants to the pond (Ex. 9).

STEP 10

- If desired, a few small fish, such as goldfish or Rosy Reds, can be added for color and movement (Ex. 10).

General Maintenance

The Aquascape Aquatic Patio Pond is simple and easy to maintain. We recommend performing a weekly water change, using a bucket or small clean container to remove approximately 15% of the water. Slowly add detoxified tap water to replace the removed water. If using a garden hose, run the hose for a few minutes to remove stagnant water. Note: topping off evaporated water does not count as a water change.

Winterization

In areas subject to freezing temperatures, the Patio Pond should be stored indoors or in a frost-free location.
