

AQUASURGE® AND AQUASURGE® PRO

Design & Performance

The Aquasurge® Line Is Designed For Use In Water Features With Skimmer And Pondless® Waterfall Style Filters

The AquaSurge® Fits A Wide Variety Of Filters

- The AquaSurge® can be positioned horizontally on its vibration-reducing rubber feet
- If space is tight in the filter, the AquaSurge® can be positioned vertically on the stand that snaps onto the end of the pump

Horizontal

Vertical

The Aquasurge[®] Is Easy To Install

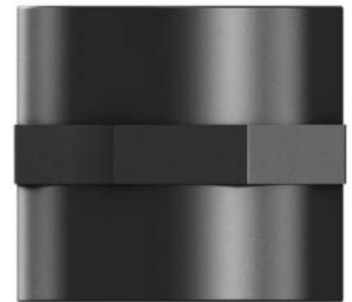

- A convenient selection of fittings are included with each AquaSurge[®] model
- These fittings save time and eliminate the frustrating process of trying to find the right plumbing fittings in the store

1 1/2" Rotational Ball Output

1", 1 1/4", 1 1/2"
Multi Hose Adaptors

1 1/2" Female Coupling

Rotational Ball Socket Fitting

- Adjustable, rotating fitting allows the pump discharge to be adjusted to the perfect position

Rotational ball socket

No Tools Required For Installation

- Fittings with threaded collars provide easy pump installation and removal.

Energy-Efficient Asynchronous Motor

- Combines the electrical efficiency of a magnetic-driven pump (mag-drive) with the flow rates of a conventional electric motor-driven pump.

Magnetic-Driven Pump

Conventional Electric Motor-Driven Pump

AquaSurge[®] Asynchronous Motor

The Hybrid-style Aquasurge[®] Motor Saves Hundreds Of Dollars In Annual Electrical Costs

- For example, the AquaSurge[®] 2000 produces 2000 gallons per hour, but costs less to operate than a 100 watt light bulb!

Aquasurge[®] Pumps - Performance Comparison

Old generation

New generation

	Aquascape AquaSurge [®] 2000	NEW Aquascape AquaSurge [®] 2000	
GPH @ 5 ft.	1,500 GPH	1,800 GPH	20% flow increase
Watts	250 W	90 W	63% power savings

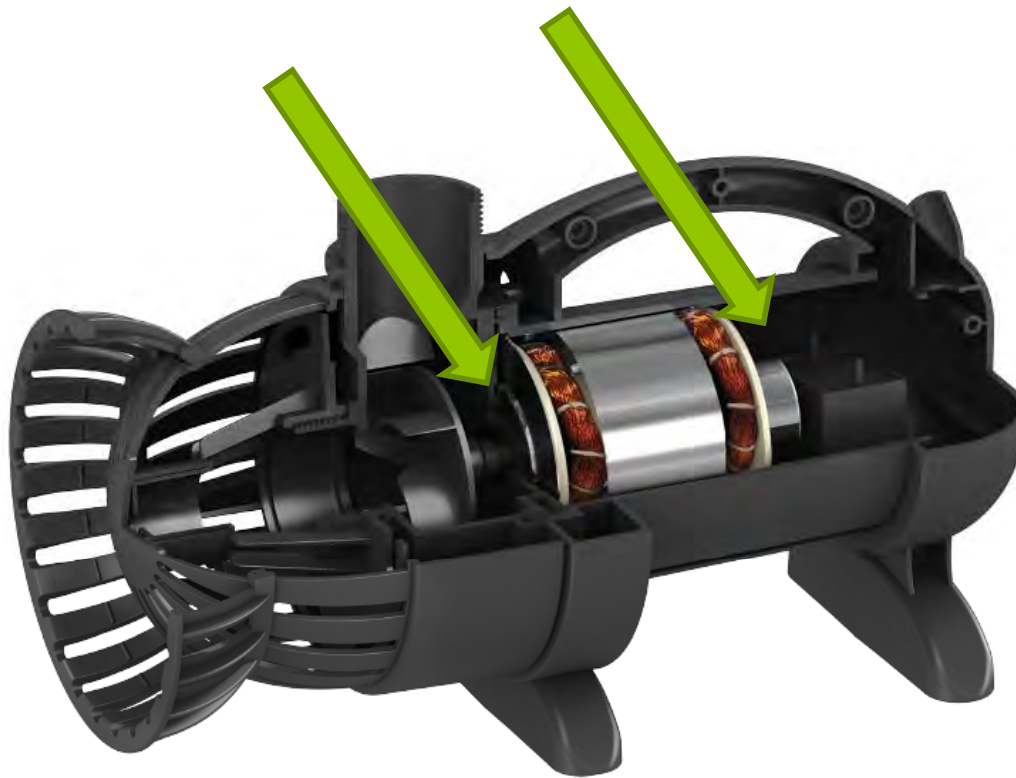

Built to Last

- Designed to meet the rigorous demands of operating 24 hours a day and 7 days a week.

Ceramic Shaft And Bearings

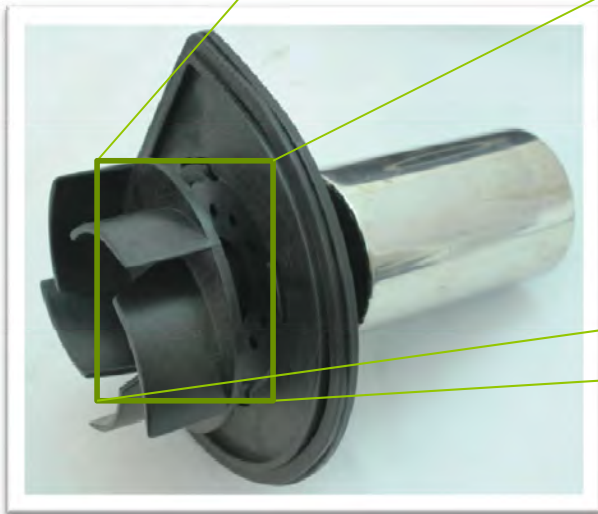

- Provides exceptional hardness, durability and less rotating resistance compared to steel, ensuring the rotor spins smoothly and efficiently.

Stainless-Steel Rotor Resists Corrosion

Water Cooling Ports Increase Circulation Around The Rotating Parts
Ensuring That The Motor Operates At The Optimum Temperature

AquaSurge[®] PRO Adjustable Flow Pump Line

- Two additional AquaSurge[®] pumps offered under the AquascapePRO[™] line.

AquaSurge[®] PRO 2000-4000

AquaSurge[®] PRO 4000-8000

Benefits of the AquaSurge® PRO Adjustable Flow Pump

- Helps contractors simplify their decision when choosing the correct pump for the job
- Allows the pond owner to easily adjust the water flow
 - They can raise the flow up when having a party or lower the flow to have a relaxing conversation on the patio or to save electricity
- Easily switch a Pondless® Waterfall on and off
- A distinct advantage over every other competitor's pumps currently found on the market

Remote Control Function

AquaSurge® PRO Remote and Receiver

- The receiver has a 150-foot range
- Each remote and receiver are paired together with a unique frequency. This allows multiple pumps to be controlled separately on one project.
- Replacement remote and receiver pairings are available, if needed

Pump Plugs Into Receiver with Unique Plug

Switch Allows Pump to Operate Using Remote or Bypass and Run on Full Power

- Receiver includes memory and resets to the previous flow rate in the event of a power failure

AquaSurge® and AquaSurge® PRO US Price Comparison

	Aquascape AquaSurge®	NEW Aquascape AquaSurge®
AquaSurge® 2000	\$399.98	\$329.98
