

ALGAECIDE

AquaScape Algaecide is a liquid algae control product that quickly and efficiently combats string algae and stops algae growth in ponds, waterfalls, and fountains. Algaecide keeps water clear and greatly reduces pond and fountain maintenance.

- Fast-acting
- Controls existing algae and helps resolve additional algae blooms
- Effectively controls many types of green water, string or hair algae, and blanket weed in ponds that contain live plants
- Can be used in ponds with fish and plants
- EPA-Registered and 6% active ingredient
- Available in a range of sizes

Available Sizes:

Algaecide

8 oz/236 ml

Treats up to 2,500 gal

Item# 96022

Algaecide

16 oz/473 ml

Treats up to 5,000 gal

Item# 96023

Algaecide

32 oz/946 ml

Treats up to 10,000 gal

Item# 96024

Algaecide

1 gal/3.78 L

Treats up to 40,000 gal

Item# 96026

Algaecide

2.5 gal/9.46L

Treats up to 100,000 gal

Item# 96053

128	\$31.49	\$62.98	\$31.49	50%
320	\$54.99	\$109.98	\$54.99	50%

Leading National Brand 4.5% Active Ingredient, EPA Registered, 16 oz. treats 4,800 gal				
Volume (oz)	Cost	MSRP	Profit Potential	Margin Potential
8	\$6.70	\$9.99	\$3.29	32.9%
16	\$9.95	\$14.99	\$5.04	33.6%
32	\$16.72	\$24.99	\$8.27	33.1%
128	\$51.26	\$79.99	\$28.73	35.9%
320	\$93.05	\$139.99	\$46.94	33.5%

Directions for Use

Add 1 teaspoon (5 ml) of Algaecide for every 50 gallons (190 L) of pond or fountain water. Thoroughly mix Algaecide into the pond or fountain by adding the treatment near the pump outflow, waterfall, or aeration device. Repeat dose every three days until algae is controlled. Once algae growth is under control, add one dose every five days. Continued weekly doses of Algaecide will control algae growth and greatly reduce pond and fountain maintenance.

EPA Required Statements

Do not use Algaecide with crustaceans, including crabs, shrimp, freshwater shrimp, and freshwater lobster.

Do not shut pond pumps or aeration devices off at night when treating water features with Algaecide.

Warm Weather Caution: Before using Algaecide, make certain that the pond has vigorous aeration such as a fountain, waterfall, or other aeration device to avoid fish loss due to low oxygen levels. When algae is removed by the filter or settles to the bottom of the pond or fountain, oxygen may drop to a harmful level if adequate aeration is not provided.

Treatment Application			
10 gal	50 gal	100 gal	300 gal
1/5 tsp.	1 tsp.	2 tsp.	2 tbsp.
