PAS-280 Power Source and Bed Redefiner Attachment

The new ECHO PAS-280 power source, when combined with the ECHO-exclusive Bed Redefiner (BRD) attachment (#99944200465), creates the perfect equipment for re-defining worn flower and mulch bed edges - doing the work seven times faster than with a shovel!

The PAS-280 features a 28.1 cc professional-grade, 2-stroke engine for plenty of power to churn through all types of soil, a tool-less coupler for easy change-out between attachments, ergonomic handle with rubber over-mold for operator comfort, a 2-stage air filtration for long engine life and is compatible with 14 different ECHO attachments.

The BRD attachment features a patented, replaceable 6-finger claw with brazed carbide tips for rugged durability, an oversized high-impact nylon shield with sight line to keep material contained inside the bed, and a large, adjustable guide wheel to operate at the appropriate depth. The BRD attachment works exclusively with ECHO's PAS-280 power source.

5 year consumer, 2 year commercial, and 90 day rental warranty
