CURV-RITE

ALUMINUM EDGING

Durability: Curv-Rite far outlasts other edgings because it will not rust, rot, or crack like steel, wood, or plastic.

Smoother curves are assured with Curv-Rite edging because it eliminates kinks and disjointed connections with its telescoping fit.

"Stake Your Future on the Leading Edge!"

Curv-Rite™ aluminum edging was designed by landscape architects and landscape contractors to offer greater flexibility in design and installation over any other edging material.

Curv-Rite's innovative design creates smooth curves with interlocking features for ease of installation.

The Curv-Rite design features include:

- Durable aluminum alloy.
- Secure telescoping connection.
- Vertically symmetrical cross-section.
- Flexible and resilient structure.
- Minimal frost heave.
- Structurally strong stakes.
- Versatile connectors – allow easy construction of corners, angles, and tees.

Telescoping Connection

Design II: CRDII

Design I: CRDI

Paver Edging

Design II offers a unique sub-surface staking mechanism ideal for paver areas as well as landscape borders. When installing pavers, Design II:

- Defines layout prior to installation
- Acts as a rigid screed form during installation
- Retains pavers securely after installation

Easy Installation

Curv-Rite's symmetrical telescoping design is easier to install, saving you time, product and money.

- The edging helps form bedlines before installation.
- Telescoping design holds joints together and eliminates the need for connector stakes or pins.
- It eliminates the need to cut edging for small length adjustments.
- Circles are easily formed with one section of edging by interlocking opposite ends together.
- Special connectors make corner or angle installations simple and precise.

Optional connectors from Curv-Rite Aluminum Edging encourage unlimited design possibilities; such as octagons, pentagons, unique shapes... anything a creative landscape designer can imagine!

Versatile Connectors

Technical Data and Specifications

To Specify: Select design, thickness, depth, length & finish.
Include 1-800-366-2878 to expedite service.

Curv-Rite edging products are typically used to define and contain plant bed areas, retain concrete/brick pavers, walking paths, jogging trails, running tracks, maintenance strips, driveways and as asphalt borders.

Size (inch)	Size (mm)	*Radius (inch)	Avail. length	Product Characteristics
1/8 x 3	3.2 x 76	18"	8' 16'	Offers Increased Flexibility Ideal For Pedestrian Traffic
1/8 x 4	3.2 x 102	24"	8' 16'	
1/8 x 5-1/2	3.2 x 140	30"	8' 16'	
3/16 x 4	4.8 x 102	42"	8' 16'	Excellent For Straight Lines. Recommended For Vehicular Traffic. Withstands Excessive Abuse
3/16 x 5-1/2	4.8 x 140	48"	8' 16'	

*These are minimum radii to be used as a guide for flexibility standards

**Additional depth adds increased strength and stability.

Design I: 12" long stakes with 1-1/4" retaining lip to engage edging.
We recommend one (1) stake every 48" of edging.

Design II: 12" long stakes with sub-surface retaining lip.
We recommend one (1) stake every 38" of edging.
Design II - 3" Depth: Special order only.
