

**Most Trusted Traveling Irrigation Systems
Since 1964**

Easy Operation

1
Pull Water-Reel
Into Position

2
Attach Water
Source

3
Pull Out Sprinkler
Cart

4
Turn On Water To
Begin Operation

Machine Will Operate Unattended Turning Off Automatically At The End Of Its Run

B-Series Water-Reels®

Athletic Fields

- Flexibility to irrigate multiple locations with one machine
- Can irrigate a sports field in a single pass
- Softens field to reduce player injuries
- Lowers maintenance costs because there are no in-ground heads to repair or winterize

Parks & Recreation

Synthetic Turf

- Only Kifco offers a machine specifically designed to cool, rinse & condition synthetic turf
- Can water the entire field in as little as 30 minutes

Golf Courses

- Improves turf conditions on fairways & roughs
- Maximizes fertilizer absorption by controlling moisture levels

Horse Arenas

- Provides excellent dust control
- Softens soil conditions for better, safer footing in show arenas and riding stables
- Promotes greener, healthier pastures & paddocks
- Quickens recovery after intense grazing

Pastures & Paddocks

(800) 452-7017

Drive System Options:

- Turbine:** Quality cast aluminum high efficiency turbine operates on pressure differential with no water wasted.
- Bellows:** Simplest & least expensive drive option. Enables the drive to operate with zero pressure loss.
- Engine:** Gasoline engine drive offers high speed retraction for faster applications such as cooling synthetic turf and dust suppression. This drive system is ideal when the water may contain debris.
- Electric:** DC Electric drive with battery & charger. This drive wastes no water, requires zero pressure and offers simple operation.

Model	Tube Inner Diameter/Length	Irrigated Width	Irrigated Length	Irrigated Acres Per Run	Drive Systems	Hours Per Full Run	Inches Depth Per Application	GPM Range	Inlet PSI Range	Booster Pump Options

*The E110 comes standard with the Sime K1 sprinkler but can also use the Sime Silver; Specifications listed here correspond to min & max ranges for both sprinklers.

**These models are also available in Engine drive.

Irrigated dimensions may vary due to wind conditions & sprinkler specifications. Irrigated widths & lengths are based on 80% of actual wetted width and length to assure acceptable uniformity.

Small Agriculture

- Control depth of irrigation based on individual crop requirements & increase yields on crops
- Promotes beautiful, lush forage for livestock
- Provides insurance against extended periods of dry weather

Cemeteries

- Improves appearance of the grounds & increases the value of burial plots
- Excellent way to irrigate hard to reach areas

Gardens & Nurseries

- Perfect for irrigating large vegetable gardens, flowers, organic produce & fruit
- Ideal for areas where irrigation is not required year round
- Grows lush, green grass in large lawns & beautifies the overall landscape

Ranches & Hobby Farms

Food Plots & Hunting

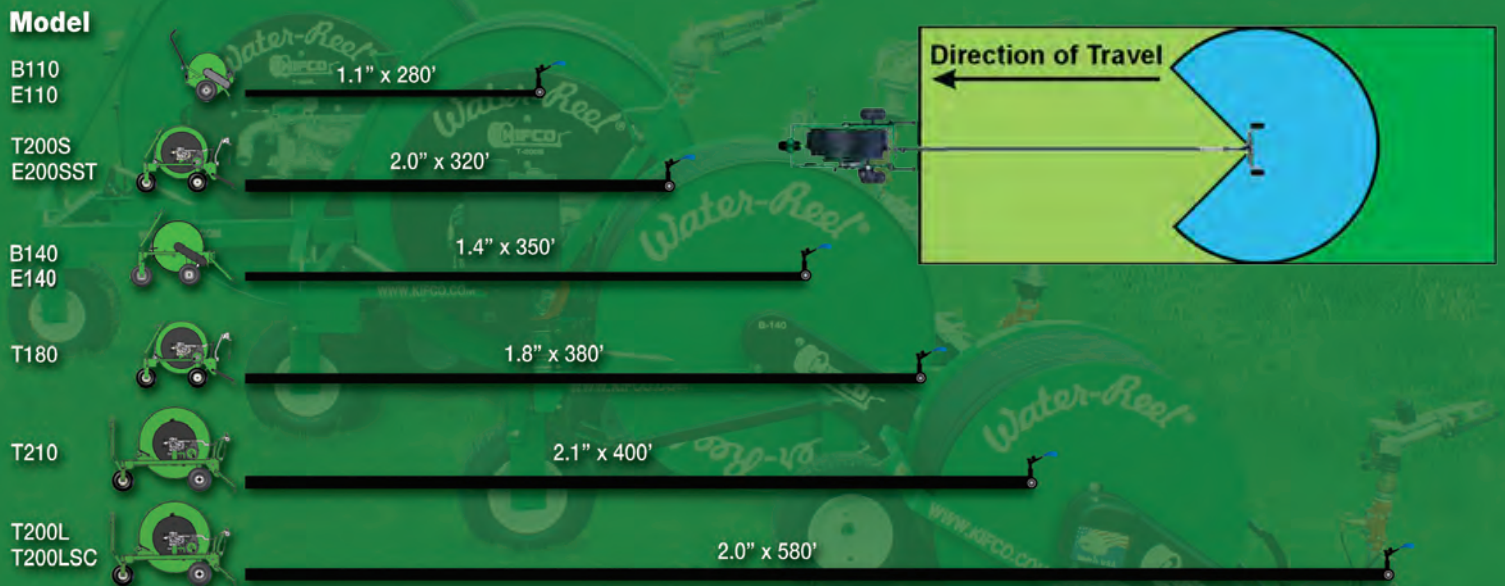

- Irrigates your food plots to attract trophy game and improves your farm's habitat

Residential

www.kifco.com

Designed and manufactured in the United States, Kifco offers Water-Reels in a variety of sizes. All models offer adjustable speed control to regulate run time & application depth, and feature automatic retraction and sprinkler shutdown. All B-Series Water-Reels come with a 2" male cam-lock inlet (models E110, B110, B140 and E140 come with 1.5") and 15' of supply hose with a MNPT end of the same size. Designed with durability in mind, all Kifco Water-Reels are constructed with a heavy duty chassis and stabilizer legs that are built to withstand the test of time.

Pumps & Options To Match Your Application

Booster Pumps

Booster pumps are available for Kifco B-Series Water-Reels and come in 1.0HP electric, 5.5 & 9 HP gasoline.

Primary Pumps

Kifco offers a line of primary pumps designed to draw water directly from lakes, rivers, ponds, creeks & canals. Gas & diesel small primary pumps are also available ranging from 5.5 to 23Hp.

T200LSC

The T200LSC is a self-contained portable Water-Reel designed to irrigate from most any open water source. This unit is fitted with a 23HP primary pump and includes all necessary accessories.

Solar Panel

Solar Panel Kits have been custom designed for Water-Reel models E110 & E140. The solar panel option is highly efficient and nearly eliminates the need for an electrical charge.

Kifco® ... Most Trusted Traveling Irrigation Systems Since 1964

- Over 50 years of experience designing, manufacturing and delivering traveling irrigation systems for every application
- Local sales and service through a network of authorized Kifco dealers across North America
- Kifco engineers and customer support technicians provide system design and troubleshooting for all Kifco products

Kifco also offers numerous Ag-Rain Water-Reels for the agricultural, dairy, municipal wastewater, polo and construction/dust suppression markets.

Kifco's rugged, portable pump packages are supplied on our heavy-duty galvanized skids making them very durable even in prolonged exposure to the elements. Packages can be customized to fit your specific pumping needs.
