

Bensumec™ 4 LF Pre-Emergent Grass & Weed Herbicide

Dependable, economical control of grassy weeds

WHAT IT IS

Bensumec™ 4 LF Pre-Emergent Grass & Weed Herbicide provides effective control of annual grasses, including crabgrass, *Poa annua*, and goosegrass. It's labeled for use on established Bahiagrass, bentgrass, fescue, perennial bluegrass, zoysiagrass, and other listed turfgrasses in residential lawns, and on greens, tees, and bentgrass fairways. And Bensumec easily emulsifies to ensure complete mixing, and eliminates spray-tank layering or clogging, even with limited agitation.

WHAT IT DOES

Bensumec controls:

- Crabgrass
- *Poa Annua*
- Goosegrass
- Foxtail
- Lambsquarters
- Other weeds as listed

Labeled for use on:

- Bahiagrass
- Bentgrass
- Fescue
- Bluegrass spp.
- St. Augustinegrass
- Zoysiagrass
- Other turfgrasses as listed

Ideal for use on:

- Golf courses (Greens, tees, and bentgrass fairways)
- Residential sites
- Do not use on parks, recreational or other public areas
