

Milled from extra heavy gauge copper and brass, this petite luminaire is perfect, whether you're specifying for a resort or a backyard. The simple geometry of the DL blends into the environment effortlessly and the beam spread of the DL provides maximum projection with minimum glare. This model is perfect for coastal exposures or areas where irrigation water contains high levels of minerals or caustic salts.

DL: Path Light

The Timeless Beauty of Copper

The appeal of a copper finish lies in its organic quality and natural mottled earthtones that develop over time. Although we ship the copper path lights in a bright condition, they will quickly transform to a penny brown (moss-green brown or a blue-green patina by the ocean).
