

GOOSE SCRAM PROFESSIONAL™

Goose Scram Professional was created to address: overgrazing, fouling of reservoirs and swimming areas where fecal matter carry bacteria, the accumulation of droppings & feathers in public use areas as well as preventing the aggressive attacks during nesting season or by food from aggressive birds. Continued re-application will TRAIN the geese to find other areas to frequent, graze in, and nest.

Recommended Spreader Settings will give you 1 lb per 350 square feet.

GENERAL APPLICATION INSTRUCTIONS: On all uses. Apply first application at a rate of 1 pound per 350 square feet. Refer to recommended spreader settings. **For Best Control Re-apply In 14 Days.** Monitor the area and reapply when evidence of geese encroaching through the treated area is noticed. Application should last 20-25 days.

PONDS, LAKES RIVERS: Application should be done up to the water beginning at the waters edge. Apply two strips approximately a band 30 feet wide for the areas seeking control in next to the water. If only doing a portion of the water front you should also run a border up the side of the area of control.

OPEN LANDING SPACES: Application should be done in 15 foot wide strips with 10 feet between the strips. This would be on landing areas and other spaces of turf encroached on by geese. If area continues to be used by geese then cover entire area leaving no strips. Apply material in opposite direction from the first application.

OPEN AREAS: Apply 30 ft. perimeter bands anywhere geese are walking onto property from other areas to prevent them from entering.

NESTING: Apply an EPIC cloth bag filled with Goose Scram Professional™ directly in nest.

GOLF GREENS: Do not apply on greens. Only apply to fringe and rough areas adjacent to greens. Application should be done at the edge of the green with material completely around the green. If goose population is heavy then do two strips around the green with coverage of approximately 30 feet wide in a 30 inch band around the green.

Do not contaminate water, food or feed by storage or disposal. Do not apply directly to water.
