Erosion
SEEDING MULCH
WITH TACK

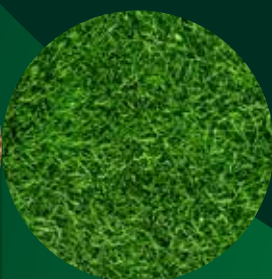

- Processed Straw
- Tack is an all-natural substance used as a food additive to hold things together (for example: ice cream, chewing gum). The natural bonding agent giving straw a tackiness which holds it together, protects grass seed from heavy washout and windy areas.
- Speeds up germination, water less often.
- Biodegrades - no mess to clean up; just leave in place after the seed grows
- Safe for pets and children, protects from birds
- Conveniently bagged. Doesn't leave your vehicle with an impossible mess to clean!

Loosen soil with a garden rake to a depth of 3 inches. Remove weeds twigs and debris. Spread seed and fertilize as recommended. Water lightly.

Cover area evenly with EZ-Straw. Protects grass seed from birds, wind and rain. Water lightly daily.

EZ-Straw helps enrich topsoil for...

GREAT RESULTS
