Whatever the surface...

...we have it covered!!!

What is "Good Paint"?

Fleet is a specialized manufacturer of line marking paints and equipment for use on various sports surfaces. We produce paints for marking Natural grass, Synthetic turf and asphalt or concrete.

We use only the highest quality raw materials to ensure batch to batch repeatability. Stringent quality control during manufacture guarantees the customer a first class product.

All Manufacturers talk about their "good paint" but what is "good paint."

If "Good Paint" is a paint that produces highly visible lines that weather really well or mixes extremely easily and does not settle into a hard layer at the bottom of your paint tank. Or is manufactured with new Chemistry that allows "high solid content" and "low viscosity" terms to be used in the same product that won't harm your grass.

How about real concentrated products that have high pigment levels that will allow you to mix at extreme dilution rates up to 20:1 and give you the control of deciding how much it will cost you to paint your fields.

"Good Paint" equals

- Extremely environmentally friendly.
- Excellent white lines.
- Long lasting weather resistant.
- Will not kill the grass.
- Easy to mix.
- Will not clog equipment.
- Has long shelf life.
- Potential to dilute to high rate.
- Low viscosity/easy to empty container.
- If you agree with the above then you are probably using our products already, if you are not a current user then this confirms that you would like to be one. – call your local dealer.

LINESTRIPE

- Supplied in five gallon pails or 55 gallon drums.
- Dilution rate from 1:1 to 3:1, depending upon application.
- Eco-friendly, VOC Free.
- Rain resistant.
- Concentrated for easy shipping.
- Easy mix formula.
- Available in white, red, blue & yellow.

FASTLINE™

- Supplied in three gallon pails or 55 gallon drums.
- High quality line marking material.
- Dilution rates from 3:1 through to 6:1.
- Very rain resistant.
- Unique physical properties ensure that a bright white line can be applied even when poor surface conditions apply.
- No mixing as paint disperses easily in water.
- Reduces maintenance by minimal settlement.
- Available in white, red, blue, yellow, and any custom color to order. Fastline colors are concentrated and are designed to be diluted with water.

Superior Line

- Superior Line is our premium field marking paint.
- Concentrated mix will yield up to 51 gallons of paint from a 3 gallon pail.

- Dilute with 6 parts water for initial line marking.
- Dilute up to 16 parts water when restoring existing lines.
- Specially formulated for Fleet machinery and easy clean-up.
- Concentrated mix saves on shipping.
