Ground Plates w/ Insulated Ground Wire

Description:

Regency's Grounding Plates are manufactured for the purpose of grounding applications as an alternative to ground rods.

The plate is cut to size from sheets of copper alloy 110.

Grounding wire construction is soft drawn insulated 6 awg copper meeting the requirements of ASTM Specification B-3.

The ground wire is connected to the plate with a weld joint.

Application:

Suitable for use in grounding applications as an alternative to ground rods.

Construction:

Plate: Copper alloy 110

Conductor: Soft drawn insulated 6 awg solid copper (ASTM Spec. B-3).

Lead Insulation: .015 Polyethylene (PE)

Plate Dimensions	Ground Wire Length	Ground Wire AWG Size
4" x 36" x .064	10'	6
4" x 96" x .064	25'	6
