

# STOP THE SALT!

## Entry® Tracks Like Water

\*This product is certified by Green Seal® for Environmental Innovation for reduced harm to aquatic life, soil, and plants; and effective performance. Greenseal.org

Entry® is best used in the first 15 feet entrance way of your building and all door ways. Its non-chloride formulation will create safe surfaces faster, without the potential for tracking, corrosion, plant damage and surface damage.

### ECO-FRIENDLY

The ONLY Green Seal Certified ice melt on the market.

### NO MESS

Entry® won't track salt inside...

### BETTER IN EXTREME COLD

Best working temps 15°F to -20°F, Does not refreeze until -63°F.

### FAST

Starts working immediately...

### SAFER FOR LAWNS

Entry® won't dehydrate your soil.

### COSTS LESS

Melt more per gallon with Entry®.

### Why Chloride Free?

Liquid Entry's neutral pH is safer on all outdoor and indoor surfaces and is residue-free, unlike rock salt and other granular chlorides.

Entry® won't attack the bonds that hold concrete together. Chlorides are particularly harmful on newly poured concrete and pavers.

## ENTRY® ELIMINATES TRACKING

Building owners and facility managers love Entry® - the first 100% CHLORIDE FREE deicer that **doesn't track indoors**.

Entry® **outperforms** granular chloride salts **at no additional cost**.

Entry's residue-free, liquid formula **is safer for surfaces, floors and metals**. Think of it as **better protection for your investment and safer for your customers**. Above all, it clears ice and snow from sidewalks, driveways and other outdoor surfaces quickly, before your eyes - before slips and falls can happen.
