

Influence 1400

Penetrant / Acidifier / Deposition Aide / Drift Control Agent

PRINCIPLE FUNCTIONING AGENTS

Phosphatidylcholine, Methacetic acid and Alkyl Polyoxethylene Ether.....80%
Inert Ingredients20%

All ingredients are exempt from tolerance requirements under 40 CFR 180.100 (d).

The “all-in-one spray tank additive” adjuvant designed for golf course applications.

Influence 1400 unique features:

Spray Penetrant - Dual non-ionic surfactant system assures excellent spreading; wetting and pesticide penetration absorption of both phenoxy and Glyphosate products equal to a full rate of an 80% active stand alone surfactant

Acidifier – Lowers tank pH from 7.6 to 5.0 and holds pH at that level even with other tank additives

Influence 1400

Drift Control - Formulation additives reduce **“off target”** driftable fines by as much as 50% from flat fan spray nozzles. Keeping the spray droplets in a more uniform size and getting them on target.

Deposition Aide – Formulation enhancements designed to prevent premature evaporation of spray droplets before target contact.

Without Influence 1400

With Influence 1400

Note great reduction of driftable off target fines.
