

Katana®

TURF HERBICIDE

Excellent control of 58 sedges, grassy and broadleaf weeds!

WHAT IT IS

Katana® Turf Herbicide kills *Poa annua*, ryegrass, tall fescue, and the toughest broadleaf weeds in turf. Katana even works in cooler temperatures where competitive products may struggle. Katana is highly selective in seashore paspalum, Bermuda, zoysia, centipede and buffalo grasses, making it excellent for effective weed control in warm-season turf or removal of overseeded cool-season grasses.

WHAT IT DOES

Katana controls:

- *Poa annua*
- Tall fescue
- Clumpy ryegrass
- Sedges (yellow, globe, purple, kyllingas)
- *Poa trivialis*
- Annual and perennial ryegrass
- More than 40 other weeds

Labeled for use on:

- Bermudagrass
- Zoysiagrass
- Centipedegrass
- Buffalograsses
- Seashore paspalum

Ideal for use on:

- Golf courses (fairways, roughs, greens, and tees)
- Professionally managed sports fields
- Spot treatments on residential lawns
