

MISTY SURFACTANT

NONIONIC SURFACTANT • HUMECT

MISTY SURFACTANT enhances the performance of a wide range of pesticides by thoroughly wetting the pest and spreading the active ingredient on the target surface.

MISTY SURFACTANT slows drying time to improve penetration through a waxy or weather hardened cuticle. A defoaming agent in the formulation eases mixing procedures and speeds load time.

USE RATES

<i>Application</i> (per 100 gallons of spray solution)	<i>Use Rate</i>
Herbicides	1 - 4 pints
