LAMP UP

Your Lighting Design

Highly efficient and robust MR-16 and G4 lamps from FX Luminaire are perfect for new and retrofit applications.

The fully potted design of our MR-16 LED lamps effectively protects against water intrusion and exposure to the elements. The G4 LED is designed with a protective clear silicon capsule to prevent lumen loss. Their low VA allows you to include more lamps per job without adding additional transformers.

MR-16

The MR-16 is a convenient, high-quality LED lamp. The MR-16 is available in three intensities, three beam angle options, and two color temperatures. Fully potted, it carries a five-year warranty.
