The Hunter Pro-C. The Right Candidate for Any Job.

On the job, you need choice. So Hunter has two controllers working hard to get your vote. The modular Pro-C (PC Series) offers a customizable controller expandable from 3-, 6-, 9-, 12-, or 15-stations with PCM modules. For a cost-effective candidate, the new Pro-C (PCC Series) is the best selection for contractors with fixed station control needs. Both controllers also feature some

great benefits, including three programs with multiple start times, independent day scheduling options with a programmable "event day off", one-touch manual start and rapid advance, one-button reset, a heavy duty locking cabinet, and two-level superior surge protection. For a higher client approval rating, elect Hunter.

Kick It Up a Notch. Way Up.

It may be a Pro, but it just keeps getting better. The new Power-Lock Slide on the modular Pro-C allows one or more modules to be easily removed or installed, and prevents any potential issues removing modules under power. Both controllers boast simplified end-user programming, allowing the ability to turn "on or off" features that are not in use or unneeded, and a total runtime calculator keeps you in the know on individual station times. We also expanded the range for seasonal adjust, now at 0 to 300%, in 5% increments, and added an Easy Retrieve™ Memory for simple access to a previously saved program. And both controllers are now sensor programmable by station, for continued, specific zone watering.

EXERCISE YOUR FREEDOM OF CHOICE

PC SERIES

Pro-C (PC): Convenient

At Hunter, we believe in the Freedom of Choice. And we stand behind both of our candidates. Does convenience get your vote?

Forget lugging around all those different controllers, and pick the Pro-C. With its ability to customize

to the particular size that you need—from 3 to 15 stations—the Pro-C reforms inventory time with only three types of units to keep in stock:

indoor cabinets, outdoor cabinets, and station

modules. Modularity also means the ability to retrofit for future expansion. And the Pro-C now boasts the Power-Lock Slide feature, which allows for a less taxing module removal.

Modular Edition

PCC SERIES

Pro-C (PCC): Cost Effective

Debating which controller to choose? The new Hunter Pro-C PCC Series is your cost-effective choice to save some capital. Focused on economics, the Pro-C PCC is a simple option for fixed station control, when you know what you need. And if you elect to have the new Solar Sync as a running mate, the Pro-C PCC is designed for the sensor to be installed directly in the controller cabinet, for a compact, coordinated system.

Conventional Edition

Pro-C Power

Features and Benefits

Independent scheduling options

Days of the week, odd/even, or 31-day intervals

Non-volatile memory

No battery required for backing up programs and current date and time; holds programs indefinitely; excellent insurance against unreliable power

Two levels of superior surge protection

Includes Hunter Quick Check™ self-diagnostic short circuit protection; microcircuits are protected from electrical spikes, with no fuses to worry about

Three programs (A, B, C) with multiple start times

Independent programming handles various watering requirements

Central control compatibility

Ready to work with Hunter's IMMS water management system

ADDED

Easy Retrieve Memory allows for retrieval of saved program

ADDED

Total run time calculator determines total of individual station run times per program

ADDED

Sensor programmable by station allows continued watering on specific zones during rain events

Remote control ready. Supplied with connection for SRR and ICR remote controls

Large LCD display for simplified programming

Modular Edition

3-Station base controller expandable to 15 stations with PCM modules

3-Station base controller expandable to 15 stations with PCM modules.

Servicing is made easy. Power-Lock feature allows for easy removal and automatic recognition of modules.

Simplified inventory means lower inventory costs.

Ability to retrofit for future expansion.

Pro-C Sensor Compatibility

Solar Sync

The best under the sun. The Pro-C works even harder with our new Solar Sync. The solar sensor measures the sun's rays and temperature to keep your lawn at peak performance with optimal watering. That means no worrying when temperatures are too hot or too cold. So take a break! We won't tell.

Conventional Edition

Designed to allow for installation for Solar Sync module inside controller cabinet.

Economical option for fixed station control.

Common features and benefits as the modular edition.

Super Sensors

Through rain, and wind, and flood, Hunter delivers. Our array of sensors, including the Rain-Clik, Wind-Clik, and Flow-Clik, works with the Pro-C to keep your lawn ready to take on Mother Nature, no matter what she brings to your home turf.
